

Logistics

Simplifying transportation management

Archway drives out unnecessary cost with a reliable transportation solution customized to your business. We take the complicated transportation process and simplify it through a step-by-step plan that is proven to provide better service, visibility and cost. We partner with you to analyze current transportation patterns around spend, service, transit time and carriers and design a comprehensive program to complement the fulfillment process. Then follow through by handling the details of your day-to-day shipping needs.

Through proprietary technology and industry expertise, we can select the optimal route to provide you the best price and we offer online order tracking for shipments so you know where your order is every step of the way. Whether it's an outbound shipment from an Archway facility, a third-party drop shipment or an inbound delivery, our transportation team manages each touchpoint in the process.

We also measure compliance through carrier bill pay and audit of agreed-upon pricing, claims management, carrier score-carding, client-specific invoicing and specialized reporting such as executive summaries, project costing and quarterly business reviews. Frequent business assessments and market benchmarks ensure pursuit of continuous improvements and opportunities to enhance and simplify your transportation management.

-
- Reduce transportation costs
 - Competitive rates based on buying power
 - Integrated real-time visibility, reporting and financial management
 - Improve inventory control with one-source logistics and warehousing
 - Minimize freight costs with carrier rate shopping and zone skipping
 - Improve tracing and tracking visibility
 - Single-source cost accounting for the entire program
 - Reduce product damage and exception management
 - Reduce shipping costs by leveraging volumes and consolidation of shipments
 - Increase on-time delivery
